

### DATALOGIC'S 'GREEN SPOT' TECHNOLOGY

The most important part of reading bar codes is to know that the device has successfully read the code in front of it. This confirmation is typically provided by the good-read beep. Depending on your environment, it is not always possible to hear the beep or in some situations it is not desirable to have repeated beeping.

Datalogic's patented 'Green Spot' technology improves user feedback by projecting a green spot directly on the code just read. This visual confirmation is perfect for applications that benefit from silent reading or in environments that are too noisy to hear the beep.

The 'Green Spot' is also effective when used to target a single code from a group of codes or to position a single code inside the reading area.

### SOFTWARE

All Datalogic mobile devices are pre-licensed and pre-installed with Wavelink Avalanche® software. This remote device management software substantially increases productivity and lowers the Total Cost of Ownership through the centralized monitoring and control of software, firmware and configuration upgrades.

Pal™ Software is a suite of four applications that provide businesses with the basic functionality to automate their core practices. The Pal application suite consists of:

- Shelf Inventory - Perfect for performing a physical inventory or cycle count in a store or warehouse. The data collected includes: Location, SKU and Quantity.
- Order Entry - Place orders in the field to replenish stock. The data collected includes: Site, Order ID, SKU and Quantity.
- Asset Tracking - Quickly and easily take an asset inventory. The data collected includes: Location and Asset ID.
- Shelf Replenishment - Instantly generate a pick list to replenish low shelf stock. The data collected includes: Store, Shelf ID, SKU and Quantity.

The application suite also includes Pal Communicator, a PC application that allows the transfer of data between a PC and the Datalogic device. This utility allows data viewing in Excel, Notepad or any user-defined host system.

### CONTINUING A LEGACY OF EXCELLENCE

Fast-paced and dynamic, the Automatic Identification and Data Collection industry requires commitment, innovation and adaptability to constant change.

Only state-of-the-art solutions can satisfy the ever-demanding expectations of customers. Datalogic always goes one step beyond. Dedication to exceeding the customers' expectations has led to the development of the widest range of high performance products and solutions in the industry. This, combined with excellent service, has made Datalogic a world leader for automatic data capture needs.

Because of extensive experience and a thorough understanding of data collection, Datalogic is the market expert when it comes to providing customized scanning and mobile solutions for specific business needs. Customers can count on Datalogic to provide the right solution for their needs with a complete range of mobile computers, handheld and fixed position scanners.

Listening is another key to Datalogic's success with a commitment to listen carefully to customers in order to create new solutions that deliver real value. Companies around the globe trust Datalogic to provide reliable solutions that benefit their businesses because of high quality service, smooth installations and continual support, assured through our extensive partner network. Datalogic stands behind you every step of the way.

	Pocket-sized mobile computer providing robust bar code reading with wireless communications.	Designed with the technology and ruggedness needed in Field Sales and Retail In-Store applications.	Rugged and complete PDA to empower the workforce inside and outside the four walls.	Rugged mobile computer is easy to deploy and manage in retail environments.	Delivers the ultimate in ruggedness, ergonomics, and real-time data capture for demanding environments.	Exceptional resistance to shock and vibration, maximum productivity and reliability in the toughest warehouse environments.
