

HP Indigo 30000 Digital Press

29 inch wide digital sheetfed press
for folding cartons

Print the vast majority of folding carton jobs

The HP Indigo 30000 Digital Press is a breakthrough 29 inch format offset-matching sheetfed solution especially designed for folding carton production. With zero setup, minimal waste, and easy versioning capabilities, the press empowers packaging converters to profitably address the evolving needs of their customers and gain a valuable competitive edge.

A shift in market demands

Folding carton converters worldwide are feeling the impact of shorter, more frequent print runs that are challenging the economics and productivity of existing systems. Supply chain pressures, growing stock keeping unit (SKU) diversity, frequent and seasonal redesigns, point-of-sale campaigns, and customized product offerings all require shorter runs and faster turnaround time.

HP Indigo meets the challenge

Digital printing is the answer to changing market needs, but it must match offset quality and color, and satisfy brands. This is the HP Indigo advantage. Its proven technology is already printing packaging for discerning global brands such as P&G, Nestlé, Coca-Cola, and L'Oréal.

Brand-approved, best-in-class quality

HP Indigo's unique ElectroInk technology delivers print quality indistinguishable from offset. Seven on-press ink stations enable converters to meet stringent corporate branding requirements.

- 4, 6, or 7 colors using HP IndiChrome for on-press Pantone emulations.
- True spot colors, mixed off-press, for outstanding Pantone-approved solids.
- The HP Indigo One Shot Color process delivers perfect color registration.

Easy fit into existing production lines

The 29 inch format facilitates quick ramp up and easy integration into current production. The press is compatible with standard sheet size, offset palette feeding, and finishing devices, thereby enabling carton converters to optimize operations and assign jobs more economically.

Wide substrate versatility

The press prints on any substrate from 8 to 24 pt. including any off-the-shelf paperboard, coated, uncoated and metalized, enabling the production of almost any box, sleeve, or blister application with offset quality.

29 inch digital sheetfed folding carton solution

Production flexibility

With 29 inch format on-demand printing and broad substrate support, the press allows for efficient use of production resources to meet the changing demands of the market.

Digital freedom. The press is capable of running over 20 different jobs per shift (1000 sheets on average per job) with automatic and immediate switching from one job to another, while keeping waste to a minimum.

High productivity. Reach a speed of up to 4600 full color sheets per hour in Enhanced Productivity Mode (EPM), a technology that enables you to print color 33% faster using only three color separations.

Wide format. The 29 x 20 inch format covers the vast majority of folding carton jobs, while offering savings in setup and tooling costs for subsequent conventional finishing.

Integrated priming unit. This inline system allows usage of any off-the-shelf paperboard.

Standards compliant. HP Indigo print is compatible with industry standards for varnishes, foil stamping, lamination, cutting, creasing, folding and gluing, and is both FDA and EU compliant for indirect food contact. For more information, please refer to the HP Indigo for Food Packaging Regulatory White Paper.

Sustainability

HP Indigo's digital, zero setup process eliminates plates and plate setting, and minimizes waste, translating into significant cost and time savings while improving environmental scorecards. On-demand digital printing also reduces waste and over-stocking throughout the supply chain, allowing converters to offer their end customers and brands leaner, more sustainable packaging solutions.

Reduce on-press waste. Save up to 250 tons of paperboard waste per year. Save up to 200,000 square feet of plate material.¹

Supply chain efficiency. Improve sustainability by reducing inventories and obsolete stock.

Eco-friendly packaging. Provide eco-friendly packaging solutions by printing on recycled paperboards.

¹ Estimate based on 20 jobs per day, and 300 make-ready waste sheets per job.

Advanced end-to-end solutions

Together with market-leading partners, HP Indigo is developing a well-integrated ecosystem for the press that provides converters all the tools needed from order to completion.

Powerful print server. The HP SmartStream Labels and Packaging Print Server is designed specifically for HP Indigo by Esko. It includes best-in-class job management tools to automate and simplify workflow, as well as a powerful Color Engine. The Color Engine is a fully integrated solution for complete color management. It quickly creates profiles that match PANTONE and spot color, ensuring accurate and efficient color matching from any technology to an HP Indigo press.

The print server is equipped with a dedicated Adobe RIP for consistent and high-quality output and enables proprietary bi-directional connectivity with Esko Automation Engine, or direct connectivity with any MIS system via JDF protocol.

Multiple VDP solutions. HP SmartStream Labels and Packaging VDP Tools, Powered by Esko, provides automatic printing of unique elements such as barcodes, text, singular numbers, photos, and security features. HP SmartStream Designer, is an entry-level VDP offering with unique creative functionalities.

Coating unit. A dedicated inline coating unit, allowing for UV and aqueous post print varnish, is provided by the TRESU Group. The TRESU iCoat 30000 was designed to meet the production capabilities of the HP Indigo 30000 Digital Press, allowing selective coating with fast changeover, producing printed and coated sheets inline.

Finishing solutions. HP Indigo has partnered with manufacturers of digital and conventional finishing technologies (such as Kama, Highcon and Scodix) to offer an end-to-end, folding carton production line.

For more information, please refer to the Labels and Packaging Workflow Solutions Brochure.

Use HP SmartStream products and partner solutions with the HP Indigo 30000 Digital Press to improve production efficiency and support digital growth. To learn more visit hp.com/go/smartstream

Technical specifications

Printing speed	3450 sheets per hour 4/0; 4600 sheets per hour in EPM
Image resolution	812 dpi at 8 bit, addressability: 2438 x 2438 dpi HDI (High Definition Imaging)
Line screens	175, 180, 180m
Sheet size	29.5 in x 20.9 in maximum
Image size	29.1 in x 20.1 in maximum
Substrate thickness	8 to 24 pt.
Substrate type	All types of paperboard, including C1S and C2S, virgin and recycled. Metallized boards and microflute top sheets.
Feeder	Palette feeder: 33.4 in of media. Drawer feeder: two drawers, with 11.8 in of media.
Stacker	33.4 in of media
Print server	HP SmartStream Labels and Packaging Print Server, Powered by Esko
Press dimensions	Length: 453 in; Width: 185 in; Height: 94 in
Press weight	28,600 lb
HP Indigo ElectroInks*	
Standard 4-color printing	Cyan, magenta, yellow, and black
5-color printing	Cyan, magenta, yellow, black, and white
HP IndiChrome 6-color printing	Cyan, magenta, yellow, black, orange, and violet
HP IndiChrome Plus 7-color printing	Cyan, magenta, yellow, black, orange, violet, and green
HP IndiChrome off-press spot inks	HP IndiChrome Ink Mixing System (IMS) for spot color creation using CMYK as well as orange, violet, green, reflex blue, rhodamine red, bright yellow, and transparent
PANTONE® colors	Supports PANTONE PLUS®, PANTONE MATCHING SYSTEM®, and PANTONE Goe™ HP Professional PANTONE Emulation Technology using CMYK on-press; HP IndiChrome on-press; HP IndiChrome Plus on-press; HP IndiChrome off-press (IMS) for achieving up to 97% of the PANTONE® color range.
Options	
Expanded color capabilities	5, 6, or 7 on-press ink stations; HP IndiChrome Ink Mixing system
Operator workstation	Proof jobs, control the press, DFE remote station
Inline Coater Adaptor	Interface between press and inline coater

*Food products and packaging are a highly regulated sector, with varying requirements depending on where they are placed on the market. Therefore, converters are reminded to ensure that all materials utilized in the printing process are suited for the intended application and its conditions of use, and that the printing is performed in accordance with Good Manufacturing Practices. HP Indigo compliance with food packaging regulations: FDA, Title 21 of the Code of Federal Regulations for indirect food contact; Swiss Ordinance on Materials and Articles in Contact with Food, RS 817.023.21; EUPIA Guideline on Printing Inks Applied to the Non-Food Contact Surface of Food Packaging Materials and Articles (November 2011); Council of Europe Resolution ResAP (2005/2) for indirect food contact; Nestlé Guidance Note on Packaging Inks, exclusion lists for indirect food contact; German Food Law and Article 3 of the EU framework regulation 1935/2004, for non-food contact.
